

## Data Privacy & Security Analyst

Status	Full Time
Location	Calgary, Canada
Salary & Benefits	Competitive
Start Date	November 2020

### About the job

MyHEAT provides innovative solutions to help make our world more energy efficient. We are looking for a *Data Privacy & Security Analyst* to join our team who can help us improve, implement, and maintain our privacy & security policies.

The ideal candidate will be familiar with data security best-practices and have some experience securing cloud hosted infrastructure. As a member of our team you would draft new policy, maintain compliance with data governance regulations, audit existing infrastructure, and advise the business and product development groups.

Key technical skills include a working knowledge of one of the large IaaS providers (AWS, Google Cloud, Azure, etc.), familiarity with network administration, experience creating network & data security policies, and the ability to understand and implement external data governance policies.

### Required Qualifications

- Bachelor's degree in computer science, engineering, or another relevant field.
- Experience managing on-site & cloud infrastructure.
- Practical knowledge of data protection & privacy practices.
- Computer security certification and/or equivalent experience.
- Excellent written and verbal communications skills for both technical and non-technical audiences.

### Preferred Qualifications

- 5+ years of relevant work experience in data privacy & security.
- CISA, CRISC, CISSP, CIPP, or related certification.
- One of the AWS certifications.
- Experience creating internal data & network security policies.
- Experience implementing external data governance policies.
- Exposure to managing large volumes of geospatial data.

### Responsibilities

- Dynamically assess and manage security risks.
- Create and maintain internal security policies.
- Manage external data governance compliance.
- Secure and monitor cloud based assets.
- Provide guidance and support to other groups related to privacy and security.

To apply, please send your resume to [careers@myheat.ca](mailto:careers@myheat.ca). We look forward to hearing from you, and we thank all applicants for their interest.
